

Product Trial Testimonial

"I was sent home from the hospital in April of 2017 after a surgery with specific concerns for a big wound (15cm x 7.5cm x 5cm). I was sent home without a Wound Vac and I felt desperate to be my own advocate! I was told by hospital staff that my healing time would probably take up to 4 months.

After I was told this, I was devastated and looking for answers. A friend heard about this excellent product, 'Pure and Clean!' I was introduced to this product and saw firsthand the amazing results of Pure and Clean. After using Pure and Clean, it was obvious this is an excellent product that keeps the wound clean, is non-toxic to your body, and speeds up healing time. It is also very affordable and can be bought locally!

Thanks to Pure and Clean, my life returned to normal much more quickly than expected. I will forever be grateful to those that helped me with Pure and Clean and especially for the great care I received while using it! I strongly recommend Pure and Clean Wound Cleanser and the First Aid spray as well!"
